

Spacetime Well

This component can be used in conjunction with SgtSpacetime to create meshes that get deformed by gravitational wells.

Radius

This allows you to set how large the well is.

Age

This allows you to set how old the well is.

Oscillate

This allows you to make the Strength value oscillate automatically.

Amplitude

This allows you to set how strong the well oscillations are.

Frequency

This allows you to set how often the well oscillates.

Offset

This allows you to set the base value of the oscillation.

Strength

This allows you to set how strong the well's effects are on the spacetime meshes.
