

Custom Starfield

This component allows you to create a custom starfield, giving you full control over each star's settings.

NOTE: Read the **Starfield** documentation for information on the shared fields.

Stars

Sprite

This allows you to set the star texture.

Color

This allows you to set the color tint of the star.

Radius

This allows you to set the radius of the star.

Angle

This allows you to set the angle of the star.

Position

This allows you to set the position of the sprite.
